Making Malayalees AI-ready

manus

∞ Meta

Meta, SoftBank, and Baidu ended the year with moves that can change the AI world.
Meta bought an AI agent that can actually *do work*, not just chat.
SoftBank poured tens of billions into OpenAI, betting big on super-power AI.
And Baidu quietly showed ERNIE 5.0

a Chinese AI model that matches or beats top US models.

One thing is clear:
AI is no longer about talking smart.
It's about **agents that act and money that decides who wins**.
I'm Alex. Welcome to L8R by Innov8.

Let's DIVE DEEP 💬👉

In today's post:

- Meta Buys Manus (Agentic AI Is Here)
- SoftBank Invests \$41B in OpenAI
- ERNIE 5.0: China's Silent AI Bomb

Meta Buys Manus (Agentic AI Is Here)

Meta bought an AI startup called Manus. This AI doesn't just chat — it **plans, clicks, writes code, and finishes tasks** by itself.

🔍 Bullet Points:

- Meta bought **Manus** for ~\$2–3 billion
- Manus is an **AI agent**, not a chatbot
- It can do research, coding, analysis, and reports
- Meta will plug this into WhatsApp, Instagram, and Meta AI

⚠️ Why It Matters:

- Chatbots talk, agents **act**
- This is AI that works like a digital employee
- Shows Meta cares more about **AI systems**, not just models
- Big threat to Google, OpenAI, Microsoft

➡️ What's Next?

- Manus inside WhatsApp for businesses?
- AI that runs ads, replies to customers, makes reports
- Agent wars are just starting

From our Partners

What investment is rudimentary for billionaires but ‘revolutionary’ for 70,571+ investors entering 2026?

Imagine this. You open your phone to an alert. It says, “you spent \$236,000,000 more this month than you did last month.”

If you were the top bidder at Sotheby’s fall auctions, it could be reality.

Sounds crazy, right? But when the ultra-wealthy spend staggering amounts on blue-chip art, it’s not just for decoration.

The scarcity of these treasured artworks has helped drive their prices, in exceptional cases, to thin-air heights, without moving in lockstep with other asset classes.

The contemporary and post war segments have even outpaced the S&P 500 overall since 1995.*

Now, over 70,000 people have invested \$1.2 billion+ across 500 iconic artworks featuring Banksy, Basquiat, Picasso, and more.

How? You don’t need Medici money to invest in multimillion dollar artworks with [Masterworks](#).

Thousands of members have gotten annualized net returns like 14.6%, 17.6%, and 17.8% from 26 sales to date.

💰 SoftBank Invests \$41B in OpenAI

SoftBank just gave OpenAI one of the biggest investments in tech history. This money is for **super-power AI and massive data centers**.

🔍 Bullet Points:

- **SoftBank** invested \$41 billion
- They now own ~11% of **OpenAI**
- OpenAI valued around \$300–500 billion
- Money will be used for chips, data centers, and AGI

💡 Why It Matters:

- AI is now a **money + power game**
- Only rich players can train top models
- OpenAI removed profit limits to raise money
- This could change OpenAI's original "for humanity" image

➡️ What's Next?

- Giant AI data centers (called Stargate)
- Faster race toward AGI
- More pressure on OpenAI to make money fast

Turn AI into Your Income Engine

The image shows the cover of a guide titled "200+ Ways to Make Money with AI" by Mindstream. The cover features a purple background with white text. Below the title is a stack of US dollar bills. The overall design is clean and professional.

Unlock 200+ AI-Powered Income Ideas

Discover innovative, actionable ways to turn artificial intelligence into a money-making machine

Ready to transform artificial intelligence from a buzzword into your personal revenue generator?

HubSpot's groundbreaking guide "[200+ AI-Powered Income Ideas](#)" is your gateway to financial innovation in the digital age.

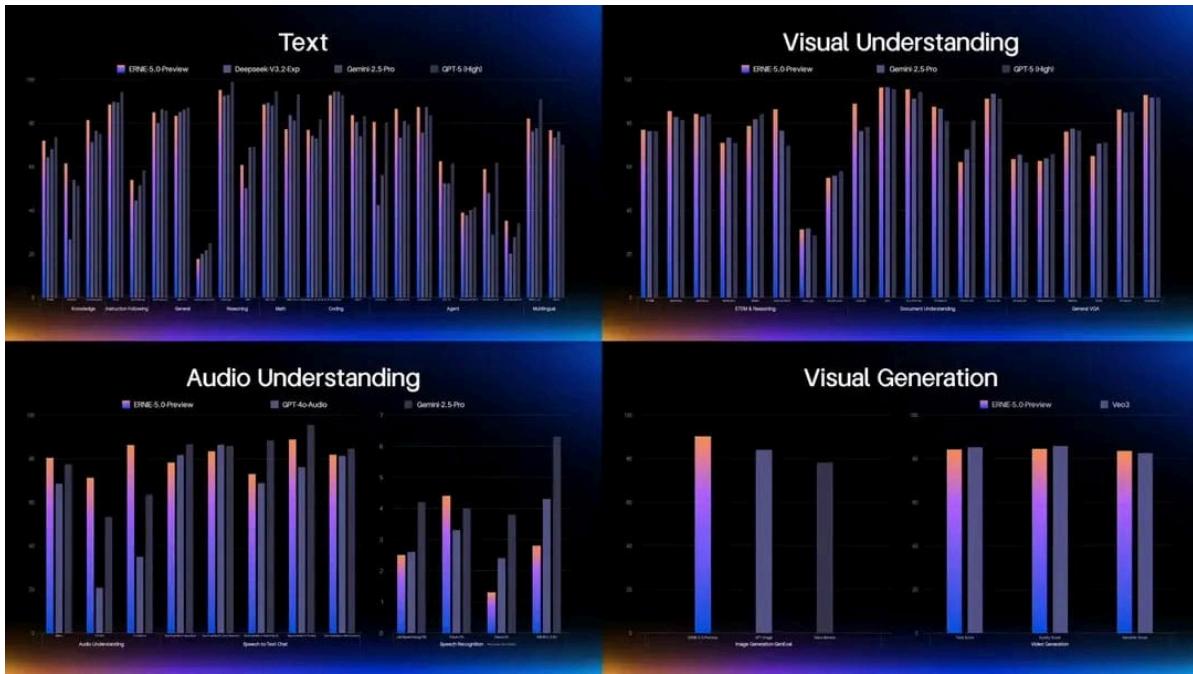

Inside you'll discover:

- A curated collection of 200+ profitable opportunities spanning content creation, e-commerce, gaming, and emerging digital markets—each vetted for real-world potential
- Step-by-step implementation guides designed for beginners, making AI accessible regardless of your technical background
- Cutting-edge strategies aligned with current market trends, ensuring your ventures stay ahead of the curve

Download your guide today and unlock a future where artificial intelligence powers your success. Your next income stream is waiting.

🤖 ERNIE 5.0: China's Silent AI Bomb

Baidu released ERNIE 5.0 — a new AI that understands **text, images, audio, video** together. On some tests, it beats GPT and Gemini.

🔍 Bullet Points:

- Built by **Baidu**
- Model name: **ERNIE 5.0**
- Top scores in reading documents and charts
- Very good at **SVG, UI, and frontend generation**
- Cheaper than GPT and Claude

⚠️ Why It Matters:

- China is catching up — fast
- ERNIE is trained on all media together (big advantage)
- AI design + code generation is improving quickly
- Western models may lose technical lead

▶️ What's Next?

- More global testing of ERNIE
- Bug fixes (SVG tool issue being fixed)

- China vs US AI competition will heat up

⚠️ Quick L8R Summary

- **Meta buys a "Digital Employee":** Meta acquired **Manus** (an agentic AI startup) for ~\$3 Billion, meaning WhatsApp might soon have AI that plans and finishes tasks for you, not just chats.
- **OpenAI gets \$41 Billion:** SoftBank just made one of the biggest bets in history, investing **\$41B** into OpenAI to build massive super-computers and race toward AGI.
- **China's Silent Win:** Baidu quietly dropped **ERNIE 5.0**, a powerful new model that understands text, images, and video all at once—and it's already beating GPT in some key tests.
